University Research Fellowships 2021
Republic of Ireland applicants

The following scheme notes set out the eligibility and application process of the University Research Fellowship. Please read through the entire document before proceeding with an application.

JK/MD/EN/07/20
Overview

Background

The Royal Society and Science Foundation Ireland (SFI) have established a partnership to ensure that outstanding early career researchers from the Republic of Ireland have the opportunity to establish an independent research career. This partnership will award a prestigious Royal Society – SFI University Research Fellowship to outstanding early career researchers. The fellowship should be hosted within an SFI Eligible Research Body. Funding will be provided for successful candidates for 5 years initially, with the possibility to apply for a further 3 years. Applicants from the Republic of Ireland will be assessed along with candidates from the UK through the normal Royal Society peer review process. Successful candidates will be awarded a fellowship by the Royal Society, the cost of which will be met by Science Foundation Ireland.

Aims of the Scheme

The University Research Fellowship (URF) programme aims to support the next generation of research leaders undertaking cutting-edge research. Those appointed are therefore expected to be very strong candidates for permanent posts in universities at the end of their fellowships.

The objectives of the URF programme are to enable outstanding early career scientists with the potential to become leaders in their field to:

- Build an independent research career.
- Give them the freedom, time and long-term flexible support to pursue high-quality and innovative lines of scientific research.
- Develop as research leaders by offering tailored high-quality professional development, networking and engagement opportunities.

Subjects Covered

Research must be within the Royal Society’s remit of natural sciences, which includes but is not limited to biological research, chemistry, engineering, mathematics and physics. For a full list, please see our guidance page.

Submissions from clinically qualified scientists may be considered. The Society does not support clinical or interventional research on humans at the individual or group level, social sciences or humanities, unless otherwise stated. If there is any doubt about the eligibility of a project, contact the Grants team.

Value of Funding and Support Provided

Funding will consist of:

**Research Fellow’s salary** – The award will contribute to a Research Fellow’s salary and research expenses. SFI also makes an indirect or overhead contribution to the host research body, which is reflected as 30% of the direct costs (excluding equipment). Overheads are payable as a contribution to the research body for the indirect costs of hosting SFI-funded research programmes and are intended to enable the research body to develop internationally competitive research infrastructure and support services.

RS-SFI URFs are an early research career fellowship, and as such, the basic salary will be at a level commensurate with your skills, and experience. The maximum contribution to the URF salary is based on the SFI Grants Team Member budgeting scale, starting at Point 1 of the Research Fellow scale (Level 3), and moving to Point 2 for the second year, Point 3 for the third year and Point 4 for year four. After year four no
further increments will be applied. Please see the SFI Grant Budget Policy for full details. Please note that the URF’s salary contribution includes PRSI at 10.95% and an employer pension at 20%.

**Research expenses** - contribution to research expenses (€15,000 in year one and €13,000 thereafter).

- **Equipment**
  You can request specialised equipment required for your research outlined in your fellowship. Any equipment costing more than €12,000 (inc. VAT) will require a 50% contribution from the host organisation (this can be financial or in-kind). Equipment purchased under this scheme is for the use of you the grant-holder. If the equipment is expected to be used more widely in the organisation, you should only request part of the total cost. In the event that the Society meets only part of the cost of the equipment, the grant holder should have priority access to the equipment during the award period. The Head of Department must confirm priority access to this equipment within their statement of support. Grant holders are not permitted to charge access costs for equipment purchased under this scheme. Applicants should clarify the VAT position on purchases before seeking a grant.

  For all equipment and services costing more than €25,000 (excluding VAT), professionally qualified procurement staff must be consulted at the beginning of the procurement process and must approve the order before it is placed with the supplier.

- **Public engagement**
  Research fellows may request up to €1,000 per year to support their public engagement activities.

- **Training**
  In addition, research fellows may use up to €5,000 for their own technical training and career/professional development e.g. professional coaching. as well as training for any staff and students supported on this grant

**Potential enhanced level of research support**

The Society currently does not yet have confirmed additional funding to offer enhanced level of research expenses within the new fellowship applications. In the event that additional funding is made available, The Society may run a further application process to enable either shortlisted candidates for interview or newly appointed research fellows to apply for additional research funding that would support the delivery of your proposed fellowship research. This opportunity would also extend to Royal Society-Science Foundation Ireland (SFI) University Research Fellows.

**Duration and Start of Fellowship**

Fellowships are expected to commence by October 2021.

Initially funding is provided for five years, with the opportunity to renew the fellowship for a further 3 years subject to satisfactory progress.

Number offered: Numbers awarded will be defined by the quality of the applications.
Eligibility

Applicant Eligibility
This scheme is open to:

- early career, postdoctoral researchers with between three to eight years of actual research experience since their PhD (i.e. date on which the degree was approved by the board of graduate studies) by the closing date of the round. Career breaks will be taken into consideration (see below for more details). And who are ready to lead their own independent research programme.
- applicants of all nationalities.

This scheme is not for researchers that:

- hold a permanent post (or rolling contract of employment) in a university or not for profit research organisation.
- hold or previously have held a nationally competitive fellowship to establish an independent research group and therefore independent researcher status (such as but not limited to the applicant being able to submit research grants as a PI or be registered as the primary supervisor of a PhD student). For example, SFI Starting Investigator Research Grant (SIRG), STFC Rutherford Fellowship, NERC Independent Research Fellowship, EPSRC Early Career Fellowship or BBSRC David Phillips Fellowship. (Note holders of postdoctoral training fellowships such as the Marie Skłodowska-Curie Actions can apply. Royal Society Dorothy Hodgkin Fellows who meet with the research experience eligibility requirements outlined above can also apply).

The Society recognises that there are diverse research career paths, as well as the challenges of managing a research career alongside other personal commitments. When reviewing applicants’ eligibility and research experience, The Society will take into consideration time spent outside of the research environment (e.g. time away due to personal reasons such as maternity, paternity, shared parental and adoptive leave or other caring responsibilities; ill-health or working in a non-research environment/role such as industry).

Furthermore, where applicants have taken formal periods of maternity, paternity shared parental and adoptive leave as the primary carer (either the mother, father, partner or adopter), or extended sick leave, the Society will allow on top of each period of leave an additional amount of time when assessing eligibility. Each case will be considered individually as per guidelines below:

Maternity, paternity, shared parental leave and adoptive leave:
On top of the actual time taken off work, an additional amount of time equivalent to the 100% taken will be added on top, for up to 6 months.
- Example 1: If an applicant took 4 months leave, additional 4 months would be added and a total of 8 months would be deducted.
- Example 2: If an applicant took 18 months leave, additional 6 months would be added (maximum additional time allowed) and a total of 24 months would be deducted.

Extended sick leave (defined as more than four weeks off work, as per UK Government’s definition):
On top of the actual time taken off work, an additional amount of time equivalent to the 100% taken will be added on top, for up to 6 months.

In some instances, the employing institution may need to confirm that the applicant qualifies for this provision. Supporting documents may be requested for individual cases at the Society’s discretion. The Society reserves the right to consider individual requests outside of the outlined policy in exceptional circumstances.
Support to applicants with disabilities:

The Royal Society welcomes applications from scientists with disabilities and provides adjustments to ensure that they can participate fully in the selection process. If you need an adjustment when accessing the application form, attending interviews, or for any other part of the application process, please contact the Grants team on urf@royalsociety.org or +44 20 7451 2666. Adjustments can include but not limited to:
- Extension of the deadline
- Additional support to complete the application form
- Technical support during interviews for candidates with hearing or visual impairments
- Support during interviews for neurodiverse candidates and those with mental health problems

The Society is committed to increasing diversity in STEM and will do everything it can to promote and encourage diversity. For example we regularly review and revise processes to ensure that all talented applicants have an equal chance to succeed. This includes ensuring all panel members are briefed on unconscious bias in decision making as part of our assessment process.

We are keen to attract and encourage more talented researchers from underrepresented groups to apply to for a University Research Fellowship. The Grants team will be pleased to answer questions about eligibility and/or points covered in this section.

Host Organisation Eligibility
Applicants must be applying to hold their fellowship in an SFI Eligible Research Body. Host Research Bodies must be situated in the Republic of Ireland. Research Bodies will include Universities, Institutes of Technology and independent not-for-profit public research organisations that receive a significant share of their total funding from public sources. Queries regarding eligibility of research bodies should be directed to SFI prior to submission. A list of eligible research bodies is available on the SFI website.

Candidates are not required to move institutions for the proposed Fellowship, however those wishing to remain at their current organisation should clearly explain their planned route to independence and reasons for staying.

Successful applicants are expected to be strong candidates for permanent posts in institutions at the end of their fellowships. Therefore, the application period may be an opportunity to begin initial discussions with your proposed host department regarding your future and the resources that they will commit to you, should your application be successful. Due to the complex nature of these conversations, we cannot provide bespoke advice.

Assessment Criteria and Review Process

Assessment Criteria

- The scientific track record of the applicant commensurate with research experience: past achievements, research career to date, publication record, likely contribution to research field, future potential to become a research leader.

- The suitability of host institution including appropriate expertise/equipment and research environment. Support for career development

- The scientific merit, originality, significance and quality of proposed research project and likelihood of achieving goals.
**Review Process**

Applications are assessed by the Research Appointments Panels; which are split by subject group into one Biological Sciences Panel and three Physical Sciences Panels. The Panel membership is likely to include Fellows of the Royal Society and Members of the Royal Irish Academy.

Your application will automatically be allocated to a Panel based on the subject group you select. All proposals submitted are initially reviewed and assessed by two members of the selection Panel who have the most appropriate scientific expertise. Following initial assessment, a shortlist is drawn up, with shortlisted proposals subject to high quality peer review. Following completion of independent peer review, proposals are re-assessed by the two Panel members assigned to the proposal, and a final shortlist for interview is drawn up with oversight by the Chair. If successful at this stage, you will be notified about your interview in March. Interviews are normally held in April. All applicants will normally be notified of the outcome of their application by the end of May.

Please be assured that the Royal Society specifically requests anyone involved in reviewing applications to consider them in confidence. More information on the Review Process can be found in Appendix 1.

All applicants will be notified of outcomes via email.

**References and Participants**

To complete and submit the application form, the lead applicant is required to provide supporting statements or references from up to three individuals (including the Head of Department at the Host Organisation, and two nominated referees). The following individuals must be included:

- Head of Department
- Two nominated Referees

It is the applicant’s responsibility to liaise with the nominated referees, the Host Organisation’s Approver, the Heads of Department to ensure that the required tasks are completed by the deadline. Please contact the Royal Society before the deadline if there is any issue. Alternatively, the Host Organisation’s Approver, the Heads of Department, and the nominated referees can contact us directly. The Royal Society will not be held responsible for emails that are not received due to address errors or spam filters and no provision is made for non-receipt of emails sent by the Royal Society.
It is recommended that referring and supporting participants fulfil their requirements at least 5 working days before the submission deadline (Thursday, 03 September 2020) to ensure there is sufficient time for organisational approval. The Host Organisation approver must approve the completed application by the submission deadline.

These individuals can be invited through the ‘participants’ tab displayed on the application form summary page, where you will find each of the required participants as described above.

Please select ‘invite’ and enter the e-mail address of the person you wish to invite to provide the relevant statements and send the invitation.

The recipient will need to accept your invitation before they can participate in the application.

You can monitor the progress of your participants’ activity through this section of the application form, and issue reminders as required. Once the recipient has accepted your invitation, their status will be displayed as ‘active’. Upon completion of their section of the application form, their status will be displayed as ‘complete’.

You will not be able to submit your application form until the status of all participants’ shows ‘complete’.

Once participants have completed all their sections of the application form, please remind them to select ‘Save & Submit’ on the application form page or select ‘Submit your contribution’ on the summary page.

Re-opening the Application form to Participants
On the occasion that an invited participant accidentally submits their section of the application form prematurely, the Lead Applicant has the ability to re-open the application form for the participant. To do this, the Lead Applicant should return to the Participant tab on the application form summary page. You will find a ‘re-open’ button alongside the name of any participant who has completed their section of the form. Once you click this button, the form is reactivated and available for participants to amend.

Research Support Role
The Research Support role displayed under the participants tab is an optional role, which allows you to invite an individual from the relevant Host Organisation research support team to review and amend the application prior to submission. The primary purpose is to ensure that the requested finances have been recorded correctly for this specific grant programme. As this is an optional role, it will not affect your ability to submit your application for approval.

Additional system guidance can be found in the ‘Systems Guidance Notes’ Section.

Contact information

Enquires about this scheme can be made using the contact details below. Before contacting us, please check whether your question is answered by these scheme notes. If not, please email urf@royalsociety.org or call +4420 7451 2666.

Please quote your application reference number in all correspondence to the Royal Society.
Use of Data

Please note that information regarding your application for University Research Fellowship may be shared with the Department of Business, Energy and Industrial Strategy (BEIS) Royal Society and Science Foundation Ireland for data monitoring and scheme evaluation purposes. You may also be contacted by selected third parties such as independent evaluators, consultancy groups, and career development organisations. If successful, the Royal Society will contact you regarding the administration of your award throughout the course of your funding and after its completion. You may also be contacted by the Royal Society, BEIS, Science Foundation Ireland or an agent acting on their behalf, for reporting and evaluation purposes throughout the course of your funding and after its completion.
System Guidance Notes

Please read these guidance notes carefully as your complete the application form.

**Using Flexi-Grant ®**

Applications can only be submitted online using the Royal Society’s Grants management system (Flexi-Grant®) via [https://grants.royalsociety.org](https://grants.royalsociety.org). Further information about the Grants management system can be found via [https://royalsociety.org/grants-schemes-awards/grants/flexi-grant/](https://royalsociety.org/grants-schemes-awards/grants/flexi-grant/). If you have not previously used Flexi-Grant®, please follow the registration process from the Flexi-Grant®, homepage. Paper-based applications will not be accepted.

Before completing the online form, all applicants should check that they comply with the eligibility requirements and ensure all necessary information is presented in the application. These requirements are strictly adhered to and applications without all the necessary information, or evidence to show the assessment criteria are met, will be rejected.

**All applications must be approved by the Host Organisation and the applicant’s departmental support must be completed before you can submit via Flexi-Grant®. Late applications will not be accepted.**

Further guidance and support can be found through the applicant and approver knowledge base.

**ORCID Identifier**

All applicants applying to University Research Fellowship should submit an ORCID (Open Researcher and Contributor ID) identifier if they have one before their application is submitted. ORCID maintains a registry of unique researcher identifiers and a transparent method of linking research funding, research publications, research data and any other research outputs to these unique identifiers. This is a mandatory requirement at the application submission stage only. You can register for an ORCID identifier via [https://orcid.org/register](https://orcid.org/register).

**Completing the application form**

The application can be completed by using the navigation tabs on the application summary page, with each page categorised as follows:

- Summary
- Eligibility Criteria
- Applicant Personal Details
- Applicant Career Summary
- Research Proposal
- Use of Animals in Research
- Financial Details
- Applicant Declaration
- Head of Department Support
- Nominated Reference Support
Please note that questions with * are mandatory fields, which is typically the majority of questions. You will only be able to submit your application for approval by the Host Organisation once all sections of the application form have been marked as complete, and your participants have marked their work as complete (please check the status of participants under the participants tab on the application form summary page). Late applications will not be accepted.

A full list of question fields to be completed as part of the application can be found in the Question Guidance in ‘Application Guidance Notes’ Section.
Application Guidance Notes

Application Approvals

It is the Applicant’s responsibility to ensure that approval of the application by the Host Organisation is completed before the closing date.

The person responsible for approving your application will be the delegated authority at the Host Organisation where you are applying to hold your Fellowship. This may be someone within the research office, Faculty administration, Vice-Chancellor, or other administrative or management role.

The approver must be someone with the authority to confirm that the potential University Research Fellowship can be hosted within their organisation, confirm that there is the capacity to deliver the proposed research and assure the proposed budget is appropriate and eligible for the scheme.

You will only be able to submit your application for approval by the Host Organisation’s Approver once all sections of the application form have been marked as complete and all participants have marked their work as complete AND have submitted their section. The Lead applicant must check the status of the participants under the ‘Participants’ tab on the summary page of the application form.

Applications submitted after the deadline will not be accepted

Please bear in mind it is the responsibility of the applicant(s) to:

• Inform the Head of Department and Referees of the deadline
• Liaise with the Head of Department and Referees to ensure that they have received their invitation with instructions to participate in completion of your application, as no provision is made for non-receipt of these automatic emails.
• Keep track of the progress of Head of Department and Referees completion status on your application summary page. You can issue a reminder email through the participants tab on your application summary page.

If the instruction email from the Royal Society has not been received please:

a) double check the accuracy of the email address supplied on the application form
b) advise the intended recipient to check their spam filters/junk folders
c) contact the Royal Society with an alternative email address for the recipient

The Royal Society will not be held responsible for automated emails that are not received due to address errors or spam filters.

Question Guidance

Please read the following guidance notes carefully as you complete the form. In the table below, each box represents a page of the application form; the left-hand column contains the questions within each of these pages as set out in the form; the right-hand column contains useful guidance on its completion.

Note that questions with * are mandatory fields.

Summary
**Summary page**

The summary page of the application form provides instructions for submission of your application for approval from the **Host Organisation**. In addition, you are provided with an overview for each section of your application form, including the approximate length of time it will take to complete each section.

The summary page also allows applicants to manage and invite participants (e.g. Head of Department and two Nominated Referees etc) who are required to contribute to the application form. Instructions for inviting participants can be found under the ‘participants’ tab on the application summary page.

**Note:** you will only be able to submit your application for approval by the Host Organisation once all sections of the form have been completed.

---

**Eligibility Criteria**

| Eligibility Criteria * | Please provide confirmation that you meet the eligibility criteria. Details of the eligibility criteria can be found in the ‘Eligibility’ Section of these Scheme Notes. |

---

**Contact Details**

| Title, Names, address, organisation and country * | Review and complete your **personal details** accurately. Errors in this section can cause difficulties in processing your application. Errors will not be corrected after submission. Under this section, you should edit the of **contact type** the participants who will partake in your application form. The system default contact type is set as ‘collaborator’. To amend the contact type of your Head of Department, click ‘edit’, and under the contact type field, select the ‘Head of Department’. **Organisation:** this table will automatically display details of the intended Host Organisation (marked by a tick) which you selected previously and your current organisation, if different from the organisation where the award will be held and administered. |

| Email address * | This field defaults to the account in which the application has commenced and is where all correspondence pertaining to the application throughout the application process will be sent. The applicant must therefore commence the application using the login email address used to register a user account on Flexi-Grant®. |

---

**Applicant Career Summary**

<p>| Full name * | Please enter your full name, including title. |
| Title of Current Position * | Please state the title of your current position. |
| Current Employer * | Please enter the official organisation name of your current employer (e.g. University of Bath). |
| Current Department * | Please enter details of your current department (e.g. Department of Astrophysics). |</p>
<table>

</table>

JK/MD/EN/07/20
This can include but is not limited to: delays in publishing/submitting a key paper(s) (please note pre-prints can be included in your publications list), pause on experiments/research plans, reduced ability to work due to additional caring responsibilities.

Plain text only 500 words

| Applicant Qualifications * | Please list all your qualifications in reverse chronological order.  
|                           | The depth of information you provide is up to you, but this will represent you under assessment and so it is worth including as much good evidence for your academic merit as possible.  
|                           | **Note:** You can retrieve your qualification information from your profile to complete this section of the application form using your ORCID identifier. |

| List your Key and/or Relevant Publications * | Please provide details of authors, titles and references of your best publications (up to 20) in refereed journals, in reverse chronological order. You should choose not only the best but also those most relevant to the application to support your case. Please note that publications will be reviewed on the basis of scientific content, rather than publication metrics or the identity of the journal.  
|                                            | Of these please identify with asterisks (*) up to five publications which you consider to be most significant.  
|                                            | If appropriate, give the publisher or URL, including any password, where each publication may be obtained.  
|                                            | Your list should have two sections: (i) refereed papers in primary journals, (ii) contributions to symposia and compiled volumes (refereed only). You can also include details of relevant pre-prints. Citations to preprints must state "Preprint", the repository name and the articles persistent identifier (e.g. DOI).  
|                                            | For publications arising from large collaborative programmes clearly specify the exact role and contribution made towards large collaborative research programmes that have resulted in multi-authored publications.  
|                                            | If your field of research differs in any way from normal conventions, e.g. lead author, first author, and publications in journals being the main gauge of success, please provide a brief explanation at the top of your publication list.  
|                                            | **Note:** You can retrieve your full publications from your profile to complete this section of the application form using your ORCID identifier. |

| Applicant Research Funding * | Please list all your current and previous research funding in reverse chronological order. |

JK/MD/EN/07/20
The depth of information you provide is up to you, but this will represent you under assessment and so it is worth including as much good evidence for your academic merit as possible.

Please give particulars (Type of award, value and title of research) and if relevant confirm if these would continue if you are successful in securing this fellowship. **Please note here pending parallel fellowship applications and when you expect to be given a decision.**

**Note:** You can retrieve your information from your profile to complete this section of the application form using your ORCID identifier.
## Research Proposal

<table>
<thead>
<tr>
<th><strong>Project Title</strong></th>
<th>Please give the full title of your proposed project.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Keywords</strong></td>
<td>Provide 5-10 keywords which could be used to identify your research. This will aid with identifying the most appropriate peer reviewers.</td>
</tr>

Named collaborators*  If you have named collaborators in your research proposal please provide letters of support.

Host Organisation*  Please select the organisation where the award will be held from the drop down list.

Host Department*  Please provide the name of the proposed department at your host organisation where you will hold the fellowship. Please enter the official name (e.g. School of Chemistry rather than Chemistry)

Justification for Choice of Host Organisation*  Please provide a short statement justifying your choice of host institution (i.e. why is it best suited for your research and career?).

Data Management and Data Sharing

The Royal Society supports science as an open enterprise and is committed to ensuring that data outputs from research supported by the Society are made publicly available in a managed and responsible manner, with as few restrictions as possible. Data outputs should be deposited in an appropriate, recognised, publicly available repository, so that others can verify and build upon the data, which is of public interest. To fully realise the benefits of publicly available data they should be made intelligently open by fulfilling the requirements of being discoverable, accessible, intelligible, assessable and reusable.

The Royal Society does not dictate a set format for data management and sharing plans. Where they are required, applicants should structure their plan in a manner most appropriate to the proposed research. The information submitted in plans should focus specifically on how the data outputs will be managed and shared, detailing the repositories where data will be deposited. In considering your approach for data management and sharing, applicants should consider the following:

- What data outputs will be generated by the research that are of value to the public?
- Where and when will you make the data available?
- How will others be able to access the data?
- If the data is of high public interest, how will it be made accessible not only for those in the same or linked field, but also to a wider public audience?
- Specify whether any limits will be placed on the data to be shared, for example, for the purposes of safeguarding commercial interests, personal information, safety or security of the data.
- How will datasets be preserved to ensure they are of long-term benefit?

Outline of data management and data sharing plan *  If the proposed research will generate data that is of significant value to the research community, then please provide details of your data management and sharing plan. (Maximum 200 words)

Overseas Field Research *  Please provide all details of any proposed fieldwork to be carried out outside the Republic of Ireland. Please ensure you provide details of location, duration and justification for the fieldwork.
### Overseas Field Research (Upload only)

Please upload documents related to the following (if applicable):
1. **Permission**
   Any mandatory documents that show local support has been assured by way of permission from the government concerned to travel to and work in the country.
2. **Collection of specimens**
   Any mandatory documents that show:
   - Specific permission has been obtained from the host country to collect and to export specimens and material
   - The director of the museum or other decision makers where these specimens will be deposited has indicated his/her desire or willingness to have such specimens and material.

### Use of Animals in Research *

The Royal Society is committed to supporting the development of alternative methods to reduce and/or replace the use of animals in research. Applicants proposing to use animals in their research must ensure that the use of animals complies with the relevant position of the Health Products Regulatory Authority ([https://www.hpra.ie/homepage/veterinary/scientific-animal-protection](https://www.hpra.ie/homepage/veterinary/scientific-animal-protection)). Additionally, applicants should continually be aware of developments in best practice, and adopt the principles of the 3Rs when designing and conducting experiments on animals.

As a funder of research, the Society takes its responsibilities towards the Health Products Regulatory Authority guidelines seriously, and requires applicants to consider the questions below when preparing grant applications that include the use of animals.

**Does your proposal involve the use of animals or animal tissue?** *
Select ‘Yes’ or ‘No’. If you have selected ‘Yes’ it is mandatory to complete all of the relevant questions on the Use of Animals in Research page.

### Experimental Design Assistant

The Royal Society recommends that applicants use the Experimental Design Assistant (EDA), which is a free resource from the NC3Rs to support researchers in the planning of animal experiments. This will help to facilitate robust study design and reliable and reproducible findings.

The EDA helps applicants build a machine-readable diagram representing their experimental plan, following capture of their methodology, and allows the applicant to then generate a PDF report which provides a transparent description of the experimental design in a standardised format, which can be uploaded to the application form.

**Please note:** Applicants who choose to use the EDA, and subsequently uploads the EDA report to the application form, are advised to enter see report or n/a into any question fields within this section of the application form that have already been captured in the EDA report, to avoid any duplication.

### Use of Human Participants and Tissue

Any application for a research proposal involving human participants, patients or tissue and therefore requiring local ethical committee approval will be considered only when accompanied by the necessary permission certificate or proof that ethical permission will be sought, which must be provided in English.
| Does your proposal involve the use of human participants, patients or tissue? * | Select ‘Yes’ or ‘No’. If you have selected ‘Yes’ it is mandatory to provide either a certificate or letter, as proof that ethical permission has been, or will be, obtained. Please upload the file as a PDF in portrait orientation. |
# Financial Details

## General Information
Science Foundation Ireland will fund a contribution to a Research Fellow's salary (including PRSI and employer pension contribution), research expenses and overheads. SFI will make an indirect or overhead contribution to the host research body, which is reflected as 30% of the direct costs (excluding equipment).

Applicants must consult with the appropriate financial administrators before completing these details.

**When completing the budget table in Flexi-Grant® please ensure to provide 100% values.**

Please provide details of the funding required for each year of the research fellowship under the relevant headings. Note that year 1 = first year of fellowship from 1 October 2021.

**Costs should be entered in Euros**

## Directly incurred costs*
<table>
<thead>
<tr>

<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>These are costs that can be explicitly identifiable as arising from the research fellowship. The university must have an auditable record for these costs.</td>
<td></td>
</tr>
</tbody>
</table>

## Basic Salary*

The aim of the Fellowship is to support researchers at an early stage of their research career. It is therefore expected that starting salaries requested by applicants will be comparable to those of early career lecturers. The salary should be at a level commensurate with your skills, responsibilities, expertise and experience. Contributions will be made at a maximum of Point 1 of the SFI Grants Team Member budgeting Research Fellow scale (Level 3) as detailed previously in Financial Policies.

Single point annual increments will be applied each year, until an individual reaches the top of the scale, after which no further increments will be applied.

## On Costs*

Science Foundation Ireland will contribute towards pay related social insurance and employer’s pension contributions, at the levels detailed in the Grants Team Member budgeting policy.

## Research Expenses*

<tbody>
<tr>
<td>Contribution to research expenses: €15,000 in year one and €13,000 thereafter. In addition to:</td>
<td></td>
</tr>
</tbody>
</table>

## Consumables*

Funding for essential consumables may be requested.

## Other Research Expenses

Other expenses may include:
- field trip expenses (including fieldwork fees/subjects/informants)
- Access charges of external facilities
- Animal and plant licence fees
- Software licenses
- Contribution to technical training costs for the fellow and team supported on the grant. Also up to €5,000 towards their own career/professional development.
- Up to €1000/year to support public engagement activity. Ideally this could link to your research, involve specific public groups from outside your organisation and aim to produce benefits for both you and the participants.
- Travel costs for attending Royal Society Training & Development Opportunities; the cost of courses, accommodation and catering is covered by the Royal Society, you only need to include the cost of your travel to the opportunities you want to take up. **Training and Development Opportunities**

Funding for undergraduate summer studentships (a stipend of up to €2000) can be requested, with normally a maximum of 2 studentships for the whole duration of the Fellowship.

Please note that costs associated with open access publications cannot be requested. Royal Society Research Fellows submitting manuscripts to Royal Society journals will currently not need to pay article processing charges. A full breakdown of animal costs must also be provided (see below).

Any request for other expenses must be fully justified.

### Animal purchases
Funding for animal purchases may be requested but should be fully justified in section 5 of the application form.

### Animal maintenance
Funding for animal maintenance may be requested but should be fully justified in section 5 of the application form.

### Travel *
Travel costs should be based on the most suitable and economical form of travel. Costs for attendance at conferences may be included, where attendance will be of direct benefit to the research. Travel costs for research collaborators may also be claimed.

### Equipment*
Funding may be requested for the purchase of specialised equipment (including the cost of installation, spares or software procurement and the annual cost of maintenance or relocation charges specifically related to the newly purchased equipment). Funding may be requested for highly specialised computer hardware.

Any equipment costing more than €12,000 will require additional justification and a 50% contribution from the host organisation. Applicants should clarify the VAT position on purchases before seeking a grant.

### Overhead costs (Indirect costs)
This will cover the institutional overhead (e.g. costs of administration, such as personnel, finance, library and some departmental services). The SFI agreed rate for overheads is 30% of the value of the award excluding equipment.

### Directly allocated costs*
Estate costs and other directly allocated costs are not required for submissions to Republic of Ireland institutions.

### Justification *
Please fully justify all requested costs for research expenses by referring to each budget heading. Funding will not be awarded without justification. **Plain text only.**

### Applicant Declaration *
**Please declare that:**

You have read the Terms and Conditions of Award under which Royal Society grants are awarded and, if a grant offer is made, you agree to abide by them. **The Terms and Conditions for Royal Society**
You have access to the necessary facilities to enable you to deliver the research proposed and will continue to have access to the facilities for the duration of the project.

You have agreed with your Head(s) of Department that you will be afforded sufficient time and resources to deliver the research project as described in this application.

You should invite two referees who can provide confidential references for your application, by following the instructions under the ‘Participants’ tab on the application form summary page. Please check with them that they are happy to provide the references, and inform them that they will be contacted by email and asked to provide references via the Flexi-Grant® system by Thursday, 03 September 2020 15:00 BST.

You will not be able to submit your application for approval from your institution until the references have been completed.

At least one referee should be someone who has worked closely with you, but the other must be external to your current research group. You should not choose both referees from your proposed host organisation, and if possible, one should be an international referee. Your named Head of Department cannot be listed as a referee.

Please You should invite the Head of Department at your host organisation to provide a statement of support by following the instructions under the participants tab on the application form summary page. Please check that they are able to supply their statement in advance of 15:00 BST 3 September 2020. You will not be able to submit your application for approval from your institution until the references have been completed.

Please Check which email address your Head of Department would like to use, as they may already be registered on Flexi-Grant® and mistakes may lead to a delay in processing your application.

The Head of Department is expected to detail your suitability for the department and also set out their intentions for your career progression at the host organisation.

Diversity Monitoring
Diversity Monitoring

The Royal Society is committed to promoting diversity in science, technology, engineering, mathematics, and medicine (STEMM) by seeking to increase participation from under-represented groups. Please help us to monitor how effectively we are doing this by providing the requested information. All questions are mandatory. The information provided will form a confidential statistical record in accordance with the General Data Protection Regulation (GDPR) and will not be used for any purpose other than analysis of the Society’s activities.

This information will be kept separately from the rest of your application and will not be seen by those involved in the selection process, including referees etc.

You must either complete the form or tick the boxes stating that you ‘prefer not to say’. If you do not select a box for each question, the system will regard your application as incomplete and will not allow you to submit it.

Please note, that where an application contains applicant and co-applicant(s) details, all applicants will be expected to complete the diversity monitoring form.

The lead applicant and co-applicant(s) are restricted to completing and viewing the diversity monitoring form that is relevant to them as individuals. You are not permitted to view the information provided by the other under this section of the application.
