Newton Mobility Grants

1. Overview

Background
This programme is offered under the Newton Fund, which is an initiative that aims to develop the long-term sustainable growth and welfare of partner countries through building research and innovation capacity, and forms part of the UK’s Official Development Assistance (ODA) commitment.

The Newton Fund was launched in 2014 and originally consisted of £75 million each year for 5 years. In the 2015 UK Spending Review, it was agreed to extend and expand the Fund. The Newton Fund was extended from 2019 to 2021 and expanded by doubling the £75 million investment to £150 million by 2021, leading to a £735 million UK investment to 2021, with partner countries providing matched resources within the Fund.

Funding programmes are developed with at least one of the partnering countries. These countries are all on the OECD DAC (the Development Assistant Committee of the OECD) list of ODA eligible recipients. The Newton Fund activities offered in each country are chosen and developed in collaboration with local government and funders. This ensures the programmes offered meet local development priorities.

Aim
This scheme aims to help strengthen the research and innovation capacity of researchers from partner countries by assisting them in visiting or sending staff and students to the UK and developing networks, research projects and partnerships with their UK hosts/counterparts and the wider UK research and innovation community. Successful candidates may wish to consider subsequently applying for a Newton International Fellowship or Newton Advanced Fellowship to consolidate partnerships.

The scheme provides funding towards travel, subsistence and research expenses for either a one-off short visit to explore opportunities for building lasting networks or for bilateral visits to strengthen emerging collaborations.

This scheme is not intended to support continued research activities between a UK applicant and an overseas applicant who was a former colleague or PhD student or to support other existing or recent collaborations between the UK applicant and overseas applicant. Rather, the scheme is intended to stimulate new collaborations between scientists in the UK and overseas partner countries, which must result in training and transferring knowledge and skill to help strengthen research capabilities of the overseas partner, and contribute to promoting economic development and social welfare in the overseas country. The awards will also initiate the development of longer-term links between the overseas and UK researchers.

Objectives of the Newton Mobility Grants
The scheme is designed to offer a flexible platform for early career and established group leaders in partner countries to interact with their UK counterparts. The main aims of the programme are to:

- Strengthen research capacity of the partner countries - by facilitating training and skill transfer from the UK to partner countries.
• Support excellent research - by linking the best researchers in the UK with the best researchers and their groups in partner countries and providing support for initial exploratory research.
• Establish long-term research links - between both partners to ensure sustainable research capacity in partner countries and benefit to the UK research community in the longer term.

Subjects covered
Research must be within the Royal Society’s remit of natural sciences, which includes but is not limited to biological research, chemistry, engineering, mathematics and physics. For a full list, please see https://royalsociety.org/grants-schemes-awards/grants/subject-groups/. The Royal Society does not cover clinical medicine (such as patient orientated research and clinical trials), social sciences or humanities, other than when working in partnership with organisations.

Clinical and patient orientated research is considered to be an interventional study on human participants at the individual or group level, including but not limited to surgical or drug intervention. Eligible use of human participants in research can include investigation where the experiments are conducted in vitro – for example, the use of human tissue or other biological samples, chemistry techniques, mathematical modelling or engineering, translational research and collaborative research with clinicians.

Value and Support Provided
The funding available is dependent upon the length of the visit and the partner country. Applicants may request:
• up to £3,000 for one-off travel lasting up to 3 months
• up to £6,000 for multiple visits to be completed within 1 year (including a maximum of £1,500 for research expenses)
• up to £12,000 for multiple visits to be completed within 2 years (including a maximum of £3,000 for research expenses)

In the case where the application is to support collaboration between the UK and Thailand, additional funding is available from OHEC to contribute the costs of the collaboration. Where applicants request the full £12,000 from the Royal Society, OHEC will provide matched up to a maximum of THB 500,000. Where candidates request less than £12,000 from the Royal Society, the funds requested from OHEC must be equivalent (for example if you request £6,000 from the Royal Society you may request THB 250,000 from OHEC).

Please refer to ‘Research Costs Justification’ on page 12 for a list of eligible and ineligible consumable items.

Transfer of funds to overseas institutions
The award will be paid to the UK institution in the first instance. Both applicants need to identify the most efficient modus to transfer the funds to the overseas institution. The Society will ensure that the funding will be transferred to the host institutions of the successful candidates.

Duration and Start date: Awards are available for either up to 3 months, 1 year or 2 years. Activities must start no earlier than 4 months after the closing date and no later than 16 September 2019.

Countries covered
The Royal Society has established partnerships with funding organisations in each of the countries listed below; as a result, scientists from these countries are eligible to apply for the Newton Mobility
Grants scheme. These partners are offering similar opportunities for UK scientists wishing to visit partner countries. This round is open to applications from:

- Brazil - Brazilian National Council of State Funding Agencies (CONFAP)
- Thailand – In partnership with the Office of the Higher Education Commission, Ministry of Education (OHEC)
- Turkey – TUBITAK

Please note that further countries may be added in subsequent rounds.

If you do not wish to submit an application with the countries listed above as part of the Newton Fund or you wish to apply for collaborations with countries not listed here, please download the scheme notes entitled ‘International Exchanges Scheme – Standard Programme’.

2. Timing and Assessment Criteria

**Opening and Closing Dates**

<table>
<thead>
<tr>
<th>Round</th>
<th>Opening Date</th>
<th>Closing Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>2019 Round 1</td>
<td>23 January 2019</td>
<td>14 March 2019 (15:00 UK time)</td>
</tr>
</tbody>
</table>

*Results available:* Results of the competition will be available about 4 months after the application closing date.

**Assessment Criteria**

The primary considerations are listed below. Successful applications should be strong in all respects:

- The training and development of the overseas researcher and the transfer of new skills to the applicant’s research group
- The research background of the UK and overseas scientist
- The strength of the scientists and institution in the area of proposed research
- The mutual benefit of the collaboration
- The strength of the proposal
- The potential contribution to the UK science base
- The potential for long-term collaboration

**Review Process**

- All applications to the Newton Mobility Grants are reviewed and assessed by two members of the selection panel who have the most appropriate scientific expertise using the criteria detailed above.
- It is expected that applicants will be notified of the outcome of their application by email

Please be assured that the Royal Society specifically requests anyone involved in reviewing applications to consider them in confidence.
3. Eligibility Details

Applicants’ Eligibility

- The overseas applicant must draft and submit an application to the Royal Society by the deadline (see page 3) for up to £12,000. Please refer to ‘Submission Process’ on page 14 for a step-by-step process.
- The Overseas based scientist and/or project leader (the applicant) and the UK based scientist and/or project leader (the co-applicant) must have completed a PhD or have extensive experience at an equivalent level at the time of application.
- The UK applicant and overseas applicant must hold a permanent or fixed term contract for the duration of the award in an eligible organisation in their respective countries. Ineligible organisations include industrial, private and commercial organisations, university spinout companies and governmental bodies.
- The UK applicant and overseas applicant must be based in their respective countries/institutions at the time of application.
- Applications must be started by the overseas applicant on behalf of the UK applicant and the respective teams i.e. the application must be initiated in the overseas applicant’s Flexi-grant account.
- Applicants and co-applicants are not permitted to submit more than one application per round (deadline) although may also apply for a Newton International Fellowship or Newton Advanced Fellowship.
- UK award holders of a current Newton Mobility Grants award with the same overseas country as the (proposed) application may not apply until the project has ended and the final report including the Statement of Expenditure has been submitted to the Royal Society.
- Retired scientists, who are still active in science, must submit their application through an eligible UK institute. If this is not possible please contact us for further advice at least two weeks before the deadline.

Eligible Activity

- Research must be within the Royal Society’s remit of natural sciences, which includes but is not limited to biological research, chemistry, engineering, mathematics and physics. For a full list, please see https://royalsociety.org/grants-schemes-awards/grants/subject-groups/. The Royal Society does not cover clinical medicine (such as patient orientated research and clinical trials), social sciences or humanities, other than when working in partnership with organisations.
- Collaborations should be based on a single project.
- Applications can only support travel between the UK and the overseas collaborator’s country; costs for travel between a third country are not eligible.
- Activities must start no earlier than 4 months after the closing date and no later than:
  a) 16 September 2019 in the case of the applications submitted to 2019/R1
- Activities fundable under this scheme are as follows:

  One-off visit collaborations
  - One visit to be taken in either direction i.e. either the UK applicant undertakes a visit to the overseas institute or the overseas applicant visits the UK institute
  - Visits to last between 1 week-3 months
  - Up to £3,000 available

  Multiple visits collaborations
  - Collaborative visits to be undertaken over a period of either up to:
    a) 1 year with up to £6,000 available, £1,500 of which can be spent on consumables
    or
    b) 2 years with up to £12,000 available, £3,000 of which can be spent on consumables
• Visits are expected to be bilateral meaning that the UK applicant and overseas applicant and/or project participants must undertake at least one visit to the overseas collaborating institute during the award period. UK Researchers may visit overseas partners for the purposes of providing training and skills transfer through collaboration.

• Any project participants must be working in a UK/overseas university or research institute. The Royal Society would like to encourage the participation of junior scientists from the overseas partner including PhD students. Funding cannot be used to support UK based PhD students.

• Only participants based at the same institution and working within the UK applicant’s or overseas applicant’s research group directly involved in the collaborative project are eligible to claim travel and subsistence against the award should the application be successful.

**Departmental Support**

• The following individuals must be included in the application:
  
  o The **applicant’s** Head of Department
  o The **co-applicant’s** Head of Department

**NOTE:** if either the UK applicant or overseas applicant is the Head of Department, then details of the individual to whom they report to must be supplied instead i.e. Head of School/Head of Faculty/Dean
4. Application Guidance Notes

Using Flexi-Grant®
Applications can only be submitted online using the Royal Society’s Grants and Awards management system (Flexi-Grant®) via https://grants.royalsociety.org. Support, FAQs and troubleshooting can be found via http://royalsocietyapplicantsupport.fluenttechnology.com/support/home. If you have not previously used Flexi-Grant®, please follow the registration process from the Flexi-Grant®, homepage. Paper-based applications will not be accepted.

Before completing the online form, all applicants should check that they comply with the eligibility requirements and ensure all necessary information is presented in the application. These requirements are strictly adhered to and applications without all the necessary information, or evidence to show the assessment criteria are met, will be rejected.

ORCID identifier: All applicants applying to the Royal Society will be required to obtain an ORCID (Open Researcher and Contributor ID) identifier before they can commence their application. ORCID maintains a registry of unique researcher identifiers and a transparent method of linking research funding, research publications, research data and any other research outputs to these unique identifiers. You can register for an ORCID identifier via https://orcid.org/register.

Further information about the Grants and Awards Management system can be found via https://royalsociety.org/grants-schemes-awards/grants/flexi-grant/.

Inviting Participants
All applications must be commenced by the overseas applicant. The UK partner will be considered as the co-applicant. The required participants (i.e. co-applicant and Heads of Department) can be invited through the Participants tab displayed on the Application Form Summary page. Under this section, please select ‘invite’ and enter the e-mail address of the participant and send the invitation. Once the recipient has accepted your invitation, their status will be displayed as ‘active’. Upon completion of their section of the application form, their status will be displayed as ‘complete’. You will not be able to submit your application form until the status of all participants’ shows ‘complete’. You can monitor the progress of your participant’s activity through this section of the application form, and issue reminders as required. Once participants have completed all their sections of the application form, please remind them to select ‘Save & Submit’ on the application form page or select ‘Submit your contribution’ on the summary page.

Departmental Support
The following individuals must be listed under the Participants tab:

- The applicant’s Head of Department
- The co-applicant’s Head of Department

It is recommended that the Departmental Support should be completed at least 5 working days before the submission deadline to ensure there is sufficient time for organisational approval.

It is the applicant’s responsibility to liaise with the UK Host Organisation’s Approver and Heads of Department to ensure that the required tasks are completed by the deadline. Please contact the Royal Society before the deadline if there is any issue. Alternatively, UK Host Organisation’s Approver and Heads of Department can contact us directly. The Royal Society will not be held
responsible for emails that are not received due to address errors or spam filters and no provision is made for non-receipt of emails sent by the Royal Society.

Re-opening the Application form to Participants
On the occasion that an invited participant accidentally submits their section of the application form prematurely, the lead applicant has the ability to re-open the application form for the participant. To do this, the lead applicant should return to the Participant tab on the application form summary page. You will find a ‘re-open’ button alongside the name of any participant who has completed their section of the form. Once you click this button, the form is reactivated and available for participants to amend.

Research Support Role
The Research Support role displayed under the participants tab is an optional role, which allows you to invite an individual from the relevant UK Host Organisation research support team to review and amend the application prior to submission. The primary purpose is to ensure that the requested finances have been recorded correctly for this specific grant programme. As this is an optional role, it will not affect your ability to submit your application for approval.

Further guidance and support can be found through the applicant and approver knowledge base.

Completing the application form
The application can be completed by using the navigation tabs on the application summary page, with each page categorised as follows:

- Page Summary
- Eligibility Criteria
- Contact Details (Overseas applicant/team leader)
- Overseas Applicant Career Summary (Overseas applicant/team leader)
- UK Co-applicant Career Summary (UK applicant/team leader)
- Research Proposal
- Use of Animals in Research
- Financial Details
- Applicant Declaration
- Head of Department UK Support (of the UK applicant/team leader)
- Head of Department Overseas Support (of the overseas applicant/team leader)

A full list of question fields to be completed as part of the application can be found in the following pages.

Please note that questions with * are mandatory fields, which is typically the majority of questions. You will only be able to submit your application for approval by the Host Organisation once all sections of the application form have been marked as complete, and your participants have marked their work as complete (please check the status of participants under the participants tab on the application form summary page). Late applications will not be accepted.

In the following table each box represents a page of the application form; the left-hand column contains the questions within each of these pages as set out in the form; the right-hand column contains useful guidance on its completion.
Please read these guidance notes carefully as you complete the form.

Please note the Lead Applicant must be the researcher based in the Newton Fund Country

</tr>
</tbody>
</table>
area and what it is about your proposed research that you find particularly exciting, interesting or important. Please also explain the potential impact or wider benefits to society of your research. (250 words max.)

### Research Proposal *

Please provide details of your research proposal. Your proposal should also include an outline of the nature and purpose of your research project including a description of the experimental methods and techniques to be used. (500 words max.)

### Outline of Data Management and Data Sharing Plan*

If the proposed research will generate data that is of significant value to the research community, then please provide details of your data management and sharing plan. (200 words max.)

The Society supports science as an open enterprise, and is committed to ensuring that data outputs from research supported by the Society are made publicly available in a managed and responsible manner, with as few restrictions as possible. Data outputs should be deposited in an appropriate, recognised, publically available repository, so that others can verify and build upon the data, which is of public interest.

The Society does not dictate a set format for data management and sharing plans. Where they are required, applicants should structure their plan in a manner most appropriate to the proposed research. The information submitted in plans should focus specifically on how the data outputs will be managed and shared, detailing the repositories where data will be deposited. In considering your approach for data management and sharing, applicants should consider the following:

- What data outputs will be generated by the research that are of value to the public?
- Where and when will you make the data available?
- How will others be able to access the data?
- If the data is of high public interest, how will it be made accessible not only for those in the same or linked field, but also to a wider public audience?
- Specify whether any limits will be placed on the data to be shared, for example, for the purposes of safeguarding commercial interests, personal information, safety or security of the data.
- How will datasets be preserved to ensure they are of long-term benefit?

### Participants *

List other project participants from both teams, their current academic role/post and why you wish to include them on the project. Participants include PhD students, post-doctoral researchers and any other research staff members from both teams. (200 words max.)

**Note:** There are no restrictions on the number of participants per team but only participants working within the applicant’s and co-applicant’s research group directly involved in the collaborative project are eligible to claim travel and subsistence against the award should the application be successful.

### Benefits to individuals/ institution *

Please describe clearly the planned outcomes and any potential benefits that will result from the proposed collaboration for you, the co-applicant and the respective organisations.

Please comment on how the award will contribute to the transfer of knowledge and research capabilities to the overseas partner, the added value of the collaboration, and the intentions for sustaining the partnership in the longer term. (200 words max.)
Benefits to UK *

Describe any potential benefits to the UK, and UK research that will result from the proposed project. (200 words max.)

Benefits to Overseas Country *

Describe any potential benefits to the overseas country and/or country of origin that will result from the proposed project. Please describe how the research will contribute to promoting economic development and social welfare of the country to benefit the wider society (200 words max.)

6. Use of Animals in Research *

The Royal Society is committed to supporting the development of alternative methods to reduce and/or replace the use of animals in research. Applicants proposing to use animals in their research must ensure that the use of animals falls within the regulations stipulated in the Animals (Scientific Procedures Act) 1986 and subsequent amendments. Additionally, applicants should continually be aware of developments in best practice, and adopt the principles of the 3Rs (https://www.nc3rs.org.uk/the-3rs) when designing and conducting experiments on animals.

As a funder of research, the Society takes its responsibilities towards the UK Animals (Scientific Procedures Act) 1986 seriously, and requires applicants to consider the questions below when preparing grant applications that include the use of animals.

Does your proposal involve the use of animals or animal tissue? *

Select ‘Yes’ or ‘No’. If you have selected ‘Yes’ it is mandatory to complete all of the relevant questions on the Use of Animals in Research page.

Experimental Design Assistant

The Royal Society recommends that applicants use the Experimental Design Assistant (EDA), which is a free resource from the NC3Rs to support researchers in the planning of animal experiments. This will help to facilitate robust study design and reliable and reproducible findings.

The EDA helps applicants build a machine-readable diagram representing their experimental plan, following capture of their methodology, and allows the applicant to then generate a PDF report which provides a transparent description of the experimental design in a standardised format, which can be uploaded to the application form.

Please note: Applicants who choose to use the EDA, and subsequently uploads the EDA report to the application form, are advised to enter see report or n/a into any question fields within this section of the application form that have already been captured in the EDA report, to avoid any duplication.

7. Financial Details

Duration *

Specify the duration of your project: 3 months, 1 year or 2 years.

Budget Table *

You are permitted to claim total costs for:

- Consumables (incl. field work). **Note:** £0 for 3 months, up to £1,500 for 1 year or up to £3,000 for 2 years project duration
- Travel (incl. subsistence)

The grand total of Travel (international), Subsistence and Consumables (inc. field work) are calculated automatically. **Note:** up to £3,000 for 3 months, up to £6,000 for 1 year or up to £12,000 for 2 years duration.

Justification for Consumables (incl. fieldwork) *

Please fully justify your request for consumables, including expenses for fieldwork. *i.e. Item 1: cost; Item 2: cost i.e. Computer software: £500; Visa charges (x4): £200 etc.*
Eligible consumable costs include Visa charges, police registration fees, postage and printing, books, reagents, computer software, stationery for overseas visitors whilst in the UK, fieldwork expenses, and animal and plant licence fees.

Ineligible consumable costs include but are not limited to Publication costs, computer hardware, bench fees, conference registration fees, travel to conferences, departmental costs/overheads, access charges, medical insurance, excess baggage, expenses relating to accompanying dependents, contributions towards salaries, costs involving travel to a third country and costs incurred by project participants not associated with the applicant organisations.

Justification for Travel (incl. Subsistence) *
Please provide justification for the amount requested.
Provide justification for the amount requested for international travel to be undertaken and the cost of individual travel expenses.

Note: international & national airfares are expected to be economy/APEX rates.

You must complete a provisional visit plan for the duration of the award presenting the details as follows as this will enable us to easily assess the eligibility of your application:

i.e. Last name of individual 1: Length of visit, Estimated date of visit, Destination, Cost; Last name of individual 2: Length of visit, Estimated date of visit, Destination, Cost. i.e.
Professor Smith: 2 months, November 2011, Taipei, £600; Professor Wang: 3 months, April 2012, UK, £900 etc.

Justification for Other Expenses
Please fully justify your request for all other expenses.
Researchers applying from Thailand only. Please provide a justification for the additional funds that OHEC will provide.

8. Applicant Declaration *
Please declare that:

- You have read the Terms and Conditions of Award under which Royal Society grants are awarded and, if a grant offer is made, you agree to abide by them.
- You have access to the necessary facilities to enable you to deliver the research proposed, and will continue to have access to the facilities for the duration of the project.
- You have agreed with your Head(s) of Department that you will be afforded sufficient time and resources to deliver the research project as described in this application.
- Please note that your declaration will be taken as a sign that your electronic signature is the legal equivalent to your wet signature on this application form.

9. Head of Department UK Support and 10. Head of Department Overseas Support *
The lead applicant/co-applicant must invite both Heads of Department from the overseas and UK organisation to provide their support.

Please check which email address the Heads of Department would like to use, as they may already be registered on Flexi-Grant® and mistakes may lead to a delay in processing your application.

The Heads of Department are expected to supply their contact details and tick Yes or No to the following statement: The applicant/ co-applicant will be provided with adequate space and access to resources within my department.
5. Other information & Enquires

Use of application data

Please note that information regarding your application for the Newton Mobility Grants may be shared with the Department of Business, Energy and Industrial Strategy (BEIS), named partners and funders for data monitoring and scheme evaluation purposes. You may also be contacted by selected third parties such as independent evaluators, consultancy groups, and career development organisations. If successful, the Royal Society will contact you regarding the administration of your award throughout the course of your funding and after its completion. You may also be contacted by the Royal Society, BEIS, named partners and funders or an agent acting on their behalf, for reporting and evaluation purposes throughout the course of your funding and after its completion.

Contact Information: Enquires about this Scheme should be made, using the contact details below. Before contacting us, please check whether these scheme notes answer your question. If not, please email: newtoninternationalexchanges@royalsociety.org or call +44 (0) 207 451 2581.
