

The Royal Society

The Royal Society is a self-governing Fellowship of many of the world's most distinguished scientists drawn from all areas of science, engineering, and medicine. The Society's fundamental purpose, reflected in its founding Charters of the 1660s, is to recognise, promote, and support excellence in science and to encourage the development and use of science for the benefit of humanity.

The Society's strategic priorities are:

- Promoting excellence in science
- Supporting international collaboration
- Demonstrating the importance of science to everyone

ROYAL
SOCIETY
PUBLISHING

Publishing with the Royal Society

Your library is now an official member of the Royal Society's open access membership programme. This means that researchers are now eligible for a discount when publishing an open access article in any of the Royal Society's renowned journals.

Benefits of publishing your research in a Royal Society journal:

- Authors maintain 100% copyright through Creative Commons license CC-BY 4.0
- Fully compliant with the requirements of a range of funders including the Wellcome Trust, HEFCE (REF 2020), NIH, Bill and Melinda Gates Foundation, HHMI, RCUK, European Commission, MRC, NERC, STFC, ESRC, EPSRC and BBSRC
- Immediate deposit in Google Scholar, PubMed, Scopus, Web of Science and other indexing and abstracting services
- Constructive peer review and rapid publication in high-impact journals
- More than 350 years of publishing experience
- All articles handled by active, expert scientists
- High production standards, including free colour online
- High visibility and exposure via a dedicated press and marketing operation

Did you know?

Authors who choose open access publication are likely to benefit from increased dissemination and citation.
