

As the UK leaves the EU, science needs the UK government to:

Keep highly-skilled scientists working in the UK and ensure that international talented people still choose to come here and contribute to our globally competitive science.

Ensure that UK and EU scientists can continue to work in each others' countries with minimal friction, bureaucracy and cost.

Demonstrate that the UK is a great place to do great science, and a welcoming place for people around the world to choose to bring their specialist skills and come and work.

Keep access to money and networks which support the UK to work with scientists around the world.

Ensure that the UK remains a part of Horizon 2020 (the EU's research and innovation funding programme) to its end.

Work to ensure that the UK has full association with the next EU research and innovation funding programme, Horizon Europe.

Maintain regulatory alignment that allows access to new medicines and new technologies.

Ensure that the UK can continue to take part in EU-wide clinical trials and European Reference Networks, which help us to do cutting edge research into new medical treatments and diagnostics, and give patients access to these.

Agree regulation and governance that will ensure that scientists can continue to work together across borders and we can all benefit from the new medicines and technologies that they create.
