Whatever the outcome of Brexit, science needs a result that:

- Keeps highly-skilled scientists working in the UK and ensures that international talented people still choose to come here and contribute to our globally competitive science.
- Ensure that UK and EU scientists can continue to work in each others’ countries with minimal friction, bureaucracy and cost.
- Demonstrate that the UK is a great place to do great science, and a welcoming place for people around the world to choose to bring their specialist skills and come and work.

- Keeps access to money and networks which support the UK to work with scientists around the world.
- Ensure that the UK remains a part of Horizon 2020 (the EU’s research and innovation funding programme) to its end.
- Work to ensure that the UK has full association with the next EU research and innovation funding programme, Horizon Europe.

- Maintains regulation that supports access to new medicines, technologies and constructive collaborations.
- Ensure that the UK can continue to take part in EU-wide clinical trials and European Reference Networks, which help us to do cutting edge research into new medical treatments and diagnostics, and give patients access to these.
- Agree regulation and governance that will ensure that scientists can continue to work together across borders and we can all benefit from the new medicines and technologies that they create.
