

# A list of public and non-profit research organisations in the UK

This document contains lists of the different types of UK public and non-profit research organisations. It accompanies the Royal Society's explainer on The role of public and non-profit research organisations in the UK research and innovation landscape. Definitions for the different types of public and non-profit research organisations and terms are included in the explainer.

The data included in this document has been collected from publicly available sources. If any of the information about an organisation is incorrect or an organisation is missing, please get in touch with us at [science.policy@royalsociety.org](mailto:science.policy@royalsociety.org).

This document was last updated in December 2020.

## Abbreviations and additional information

The following abbreviations are used in the lists.
